## **Alyotech France inaugurates its new subsidiary Alyotech Security**

Eager to complete its offering customer, the [ALYOTECH Group](#) announced today the establishment of its subsidiary [ALYOTECH SECURITY](#). Based in Paris, this new subsidiary will deploy from February 2008 a centre of high-level expertise in the field of computer security, thereby enhancing the range of services offered to its customers.

The creation of [ALYOTECH SECURITY](#) was born of the collaboration of management of [ALYOTECH Group](#) and Franck Giami, an expert in the field of security, and who has worked for many years in the field of security with large accounts such as Airbus, Eurocopter, LVMH, Orange, Credit Agricole, Groupe Lucien Barriere...

[ALYOTECH SECURITY](#) proposes high value added interventions in the scope of IT operational security, like diagnostic and audit of company security processes, based on IT, security, quality standards, state of the art practices, such as ISO27002, ISO29000, CMM, ITIL; Network, OS and application deep testing; Implementation of operational solutions to mitigate risks particularly by using dependability means (fault prevention, tolerance, removal and forecasting) and principles (Identification and authentication, access control, accountability and audit, object re-use, redundancy, design diversity, graceful degradation, defense in depth, defensive programming, partitioning and separation, ..).

« *We are convinced that nowadays, security is becoming a more and more strategic stake for companies, reckoning with intrusion and hacking freaks and we want, thanks to Alyotech Security to be in a position of an uncircumvented actor in this domain* » said [Group ALYOTECH's](#) management staff.

Established in August 2005, the group Alyotech represents a workforce of over 1,400 people and annual revenues of around € 100 million, split between France, Continental Europe, Africa and Canada. Basing its strategy on sustained organic growth and external growth momentum, the Alyotech Group aims to quickly become a major player in international dimension in the universe Council technologies, present in such sectors as Aerospace, Defense, Energy, Transport, Telecommunications...
